General tolerance: $< \pm 0.5\text{mm}$

Primary through-hole: $D 15.6 \pm 0.50\text{mm}$

Connection of Secondary: MOLEX 39-28-8040(old part number:5566-04A-210)

Remarks:

- When the current goes through the primary pin of a sensor, the voltage will be measured at the output end.
- Custom design is available for the different rated input current and the output voltage.
- The dynamic performance is the best when the primary hole is fully filled with.

WARNING : Incorrect wiring may cause damage to the sensor.
